

Nu-Way Homeowner Septic Guide

A simple reference homeowners can keep for septic system care.

Signs Your Septic Tank May Need Pumping

- Slow drains throughout the house
- Gurgling toilets or drains
- Sewage odors indoors or outdoors
- Wet spots near the drain field
- Several years since the last pumping

What Not To Flush

- Wipes (even 'flushable' wipes)
- Paper towels
- Grease and cooking oils
- Feminine hygiene products
- Harsh chemicals and solvents

Protect Your Septic System

- Conserve water when possible
- Keep heavy vehicles off the drain field
- Maintain pumping records
- Schedule routine inspections and pumping

Service Record
